October 1, 2018  
RE: FDA Plant Registration

This letter hereby certifies that Grassland Dairy Products, Inc., Greenwood Milk Products, West Point Dairy Products, LLC, West Point Dairy Products d/b/a Alcam Creamery and Graf Creamery, Inc. wholly known as or referred to as Grassland Dairy Products for the purpose of this document, have duly re-registered our manufacturing facilities with the Food and Drug Administration on October 1, 2018 as required by the Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (Bioterrorist Act) and Food Safety Modernization Act.

Grassland Dairy Products will no longer provide the FDA plant registration number for our facilities due to the following:

1. The FDA recommends maintaining any information that might pertain to either food safety and/or security is kept confidential and not shared with outside parties. FDA's Proposed Regulations for the Establishment and Maintenance of Records under the Biosecurity Act mandates that firms must know considerable information about its non-transport supplier and product receipts, but does not cite the need to document any information about plant registration numbers.
2. As a result of the national events, many companies, including Grassland Dairy Products, have curtailed sending out any information that deals with potentially sensitive food-safety or security information. Such data is deemed proprietary, may not be copied, and is only available during an in-plant audit.
